6 Summer Zoo Camp Themes
Little Critters Zooperheroes: Superhero powers are all the things that animals can already do! Campers will investigate the animals that have inspired the creation of famous superhero abilities.
Little Critter Dinosaur Roar: Discover the wonderful world of dinosaurs! We'll dig our way back through time to learn about these ancient animals, explore theories about their extinction, and meet some of their modern day relatives. Games, crafts, activities, animal encounters & behind-the-scenes explorations will guide our journey to the past.
Junior / Cadet Wild Rides: What about the rides? Every camp season our animal enthusiasts want to know more about our "Frog Hopper", "Dragon Fliers" & "Danny the Dragon Train"-like experiences. This NEW, highly-requested camp is here to teach campers how the rides move like the zoo animals do & how we make it happen. We will combine a study of the animals & explore the rides through behind-the-scene tours, games, crafts, activities, animal encounters & wind-in-our-hair experiences.
Jr. / Cadet Zoology Mythology: The worlds of myth, folklore, fantasy & fairy tales are full of animal-based creatures that we will discover, unearth & design in this NEW summer camp for 2022. Fantastical beasts, crazy chimeras & other legendary creatures will inspire us through our classroom, park & zoo explorations in this summer camp experience.
Jr. / Cadet / In Training Vets: Campers will learn the tools, tests and time it takes to care for the zoo animals. This camp will dive into the digestive, skeletal, muscular, respiratory & circulatory systems & operate a little bit of "surgery & diagnosis" as well.
Cadet / In Training STEAM-powered Zoo: Science Technology Engineering Arts Mathematics are at the core of this NEW summer camp where we traverse potential S.T.E.A.M. career paths for our campers. We will be experimenting with different kinds of science from "Astronomy to Zoology" and tying in math & art in the best possible way. With the zoo animals, engineering-design feats, various artistic media, outdoor field data collection, microscopes & other laboratory equipment, we are going to discover it all.
